VM-99 VidiMax

Brush and cleaning-pad system for specialized glass surfaces.

The VidiMax is a brush and cleaning-pad system for glass computer screens and any specialized glass surface. It's super-soft brush wipes dust particles from screens, and the remarkable non-liquid cleaning compound removes messy fingerprints quickly and easily. Safe for all TV screens, LCD screens, computer monitors and laptop screens, scanners, copiers, and other high-quality glass screens. This unique cleaning compound will not spill or dry-out and is environmentally friendly and non-toxic.

Directions:

- Pull handle back and up, this releases VidiMax brush from its base. Wipe dust particles from screen surface.
- Place VidiMax brush back into base. Push button and slide back VidiMax cleaning-pad.
- Wipe screen with smooth circular motions of the soft chamois cleaning-pad. If any smudges persist, breathe gently on the surface to be cleaned and repeat process.
- Slide VidiMax cleaning-pad back onto VidiMax brush and base. This replenishes the unique cleaning compound.

Note:

Do not use on wet surfaces. Follow all directions carefully for safe use.
